	COX S.A.					
1.	This opinion contains indication	one relating to the follo	wing Home			
'	This opinion contains indication—	ons relating to the folic	owing items:			
	☐ Box No. I Basis of the op	pinion				
	☐ Box No. II Priority					
	_		rd to novelty, inventive	e step and industrial applicability		
Ì	☐ Box No. IV Lack of unity of invention ☐ Box No. V Reasoned statement under Rule 43 <i>bis</i> .1(a)(i) with regard to novelty, inventive step or industrial					
	applicability; citations and explanations supporting such statement					
	☐ Box No. VI Certain documents cited					
	Box No. VII Certain defects in the international application					
☐ Box No. VIII Certain observations on the international application						
2.	FURTHER ACTION					
	If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notifed the International Bureau under Rule 66.1 bis(b) that written opinions of this International Searching Authority will not be so considered.					
	If this opinion is, as provided abore submit to the IPEA a written reply months from the date of mailing owhichever expires later.	together, where approp	riate, with amendmen	PEA, the applicant is invited to nts, before the expiration of three of 22 months from the priority date,		
	For further options, see Form PC	T/ISA/220.				
3.	For further details, see notes to F	form PCT/ISA/220.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2004/013683

	Во	x N	o. I Basis of the opinion			
1.	With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.					
		lar	is opinion has been established on the basis of a translation from the original language into the following inguage—, which is the language of a translation furnished for the purposes of international search and results and 23.1(b)).			
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:					
	a. type of material:					
			a sequence listing			
			table(s) related to the sequence listing			
	b. format of material:					
	١		in written format			
	1		in computer readable form			
c. time of filing/furnishing:						
	ı		contained in the international application as filed.			
	[		filed together with the international application in computer readable form.			
	I		furnished subsequently to this Authority for the purposes of search.			
3.		ha: co	addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto is been filed or furnished, the required statements that the information in the subsequent or additional poies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.			
4.	Additional comments:					

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N) Yes: Claims 1-98

No: Claims

Inventive step (IS) Yes: Claims 1-98

No: Claims

Industrial applicability (IA) Yes: Claims 1-98

No: Claims

2. Citations and explanations

see separate sheet

#### Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The following documents have been cited in the International Search Report:

D1: WO 98/21193 A (NICOX) 22 May 1998 (1998-05-22)

D2: EP-A-0 637 583 (PRODESFARMA) 8 February 1995 (1995-02-08)

D3: EP-A-0 200 915 (BOEHRINGER MANNHEIM) 12 November 1986 (1986-11-12)

D4: JAYACHANDRAN ET AL: "Up-regulation of endothelial nitric oxide synthase through beta2-adrenergic receptor: The role of a beta-blocker with NO-releasing action" BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS, vol. 280, no. 3, 2001, pages 589-594, XP002321567

#### Novelty (Article 33(2) PCT)

The present compounds differ from the compounds in D1 in the definition of the groups R1 and R2 and from the compounds in D2 to D4 in the binding site of the nitrooxy group.

The present compounds are novel.

### Inventive Step (Article 33(3) PCT)

D1 discloses nitrooxy derivatives of the beta-blocker timolol. D2 discloses nitrooxy derivatives of the beta-blockers propranolol, metoprolol and atenolol. D3 discloses beta-blockers which are carbazol-nitrooxy derivatives. D4 discloses the beta-blocker nipradilol which has a nitrooxy function.

D1 could be regarded as the closest prior art.

The problem of the invention was the provision of new beta-blockers with an improved pharmacology.

#### International application No.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

PCT/EP2004/013683

The Applicant has demonstrated by means of a comparative assay that nitrooxy derivatives of carvedilol have an effect on the cGMP accumulation in cells.

This specific pharmacological effect is not suggested for the present compounds by none of the cited documents neither alone or in combination.

The present invention is therefore based on an inventive step.
